October 13, 2021

Dear Sertis:

I am writing to apply for the Machine Learning Engineer Internship opportunity during June 2022 – July 2022. Sertis's internship program is fantastic and fascinating to me. I believe my experience and ability will be beneficial in assisting the company's growth.

I have extensive experience in computer programming, media design, 3D modeling, and Internet of Things (IoT). The majority of my experience has been in problem solving with computer programming and algorithms. I am in my second year of Robotics and Artificial Intelligence Engineering at KMITL. Throughout high school and university, I worked on numerous mini projects involving microcontroller and microprocessor programming.

I believe I could contribute to your program. This internship would allow me to help your organization while also expanding my abilities. Thank you for your time, consideration, and forthcoming response.

Sincerely,

Charnkanit Kaewwong
